## *First Aid Policy*

**To be Approve at Federation Governing Body**

**April 2017**

Frequency of Review: 3 years

Policy based on LA First Aid Policy September 2015

### Amendments

JA/JW Federation SLT 17/02/2017

## *Overview*

First aid is the immediate treatment necessary for the purpose of preserving life and minimising the consequences of injury or illness until expert medical assistance can be obtained. First aid also includes the initial treatment of minor injuries, which will not need treatment by a medical practitioner.

It is a legal requirement to implement and maintain effective systems for ensuring the provision of adequate and appropriate first aid equipment, facilities and personnel at individual workplaces and during off-site activities.

## *First Aid Provision*

The first aid provision at each workplace will be decided based on an assessment of need. The Assessment of First Aid Provision Form is completed at each school site to assess the first aid requirements against set criteria, this assessment is reviewed annually and where changes occur.

First aid provision must be adequate during all working hours, so planned annual leave, maternity leave of first aiders and appointed persons must be covered. If first-aiders are absent, an appointed person must be available.

The individual workplace arrangements must be effectively communicated to employees and visitors indicating how to access first aid.

## *Types of First Aid Personnel*

**A First Aider (FAW)** is someone who has undergone a training course in First Aid at Work and who holds a current First Aid at Work Certificate. Their role involves:

- undertaking first aid treatment in accordance with their training,
- summoning an ambulance or other external medical services,
- liaising with the premises manager to ensure first aid kits are fully stocked and refilled after use,
- keeping suitable records of all treatment administered.

**An Appointed Person** is someone who is nominated to take charge of a situation in the absence of a qualified first aider or emergency aider. Their role includes:

- taking charge when someone is injured or falls ill,
  - calling an ambulance (where required), and
  - being responsible for first aid equipment e.g. re-stocking the first aid box.
- Appointed persons are not first aiders and so should not attempt to give first aid for which they have not been trained. They may give emergency first aid where trained to do so (normally by completing the Emergency First Aid at Work Certificate).

## *Additional First Aid Requirements Early Years*

All first schools within the Penk Valley Federation meet the Statutory Framework for the Early Years Foundation Stage which requires that at least one person who has a

current Paediatric First Aid Certificate will be on the premises at all times when children are present. In addition there must be at least one person on outings who has a current paediatric first aid certificate.

### *Coach Assistants/Drivers and Attendants*

School mini bus drivers undertake Emergency First Aid training to enable them to respond to an emergency medical situation until skilled help arrives.

### *First-Aid Materials and Equipment*

All Penk Valley Federation schools clearly identify the first aid provision, ensuring the necessary materials, equipment and facilities are provided and maintained in accordance with the need. This includes ensuring that first-aid equipment including a body spills kit is suitably marked, easily accessible and available in all places identified by the assessment.

Routine inspection of the contents of first-aid containers are conducted. Sufficient supplies are held. All schools discard any items after the expiry date has passed.

### *Training of First Aid Personnel*

Employees who volunteer or are selected to be first aiders should be suitable for the task.

All employees who undertake first aid duties must be competent to carry out their role. The content and duration of training necessary will depend on the role of an individual.

<b>Course</b>	<b>Intended For</b>	<b>Duration of Course</b>	<b>Recommended Refresher training</b>	<b>When revalidation is required</b>	<b>Revalidation Training</b>
First Aid at Work Certificate (FAW)	First Aiders	3 days	Annual basic skills update 3 hours	Before expires (3 years from date of certificate)	2 day revalidation
Emergency First Aid at Work Certificate (EFAW)	Emergency First Aiders and Appointed Persons if deemed necessary	1 day	Annual basic skills update 3 hours	Before certificate expires (3 years from date of certificate)	Repeat of original 1 day course.

In certain cases, where activities might expose individuals to unusual risks e.g. remote outdoor activities, additional specifically focused training might be necessary according to the circumstances.

### ***PROCEDURES***

In case of concern about the health of an individual the following precautions should be followed:

1. the child is sent to a qualified first aider
2. the injury/ concern is checked and an assessment made of the level of treatment needed
3. a decision will be communicated to the class teacher and or head/ office staff as necessary
4. parents are informed when necessary

### ***Levels of action include:***

- Treatment on school premises for minor ailments/ accidents
- Treatment on school premises with a head bump letter or grazed knee letter sent home informing parents of the nature of the incident/ accident and treatment given
- **Pupils may only have sticking plasters applied if parental consent forms give permission.**
- Where an injury is deemed severe enough to be checked by a medical person but not severe enough for hospital, parents are contacted
- If an injury is very serious or there is any uncertainty about the level of severity an ambulance will be called immediately and parents informed. An appropriate member of staff will attend hospital with a child in the absence of a parent. There is a money tin and mobile phone in the office which can be taken by the staff member.

### ***In each case every attempt should be made to:***

- Check the injury to the best of our ability
- Inform the relevant people in the case of more serious incidents. This includes:
  - headteacher
  - parents/carers
  - LA
- Keep accurate records of the injury, events leading up to the injury and subsequent actions.
- Always err on the side of caution & listen to the child
- Consider the needs of the child as central to all actions

### *Reporting & Investigating an Accident*

All accidents involving children are reported in the minor accidents book kept in the First Aid Area.

Where an employee is injured they should complete the B1510 Accident Book. If that is not possible then someone may do this on their behalf. Accidents involving injury to children on work experience and work placements must be reported to the school and recorded in the Accident Book.

All severe accidents should be reported to county using form HSF40 and an investigation into the root cause carried out.

### *Review of Policy*

This policy will be reviewed every 3 years, or before if necessary by the Federation Governing Body.

Ms Beddows	Lunchtime Supervisor	Basic Paediatric	06/09/2016	06/09/2019

**EQUIPMENT**

The main first aid box is kept in the Year 1 area. It contains only approved equipment, together with allergy/medical notes. There are first aid boxes in each classroom. They contain latex gloves, which must be used for first aid treatment, particularly if blood is present. This is to eliminate the risk of HIV virus infection. There is a yellow bin in the Yr 1 area for the disposal of blood products. There is a cool box for summer lunchtime injuries. This can be taken onto the field.

For the supervising of an out-of-school visit there is a first aid box in the stock cupboard – staff must ensure that this and/or the class box is taken on a trip.

Office staff routinely check and replenish stocks as necessary.

### EQUIPMENT

A fully equipped medical room is available and staffed during the school day. Our medical kits contains only approved equipment, individual pupil medication is kept in a locked cabinet. There are first aid boxes located around the school, they contain latex gloves, which must be used for first aid treatment, particularly if blood is present. (This is to eliminate the risk of HIV virus infection). They also contain plasters and cleansing wipes. In department areas such as science and design and technology, additional more specialist supplies are available. There is a yellow bin in the medical room for the disposal of blood products

Whenever a school visit is arranged, a separate back pack is made available, which contains emergency first aid equipment, and relevant medical information for pupils.

First aid staff routinely checks and replenish stocks as necessary.
